VIA E-MAIL and U.S. MAIL

Mr. Scott Bemis
Responsible Care Leader
The Dow Chemical Company
Michigan Operations
1790 Building, Washington Street
Midland, Michigan 48674

Dear Mr. Bemis:

SUBJECT: Amendment 5, Hazardous Waste Management Facility Operating License:
Closure and Postclosure Care Plans and Cost Estimates; The Dow
Chemical Company, Salzburg Landfill, Midland, Michigan; MID 980 617 435

The Department of Environmental Quality (DEQ), Office of Waste Management and Radiological Protection (OWMRP), Hazardous Waste Section (HWS), has reviewed the updated Closure and Postclosure Care Plans and Cost Estimates templates for Salzburg Landfill received from The Dow Chemical Company (Dow) on February 5, 2016, and most recently updated September 15, 2016. A minor modification is required to be made to Dow's hazardous waste management facility operating license, issued September 25, 2015 (License), in order to incorporate the templates as updated attachments to the License. Based on the HWS's review, the License is hereby modified, as further specified below:

Salzburg Landfill Closure and Postclosure Care Plans Template

This minor modification request was initially submitted on February 5, 2016, and most recently updated on September 15, 2016, pursuant to the compliance schedules in License Condition XII.A. In accordance with Condition XII.A, final templates that need to be incorporated into the License as enforceable attachments will be added via a minor License modification(s).

Therefore, the minor modification request is hereby approved. The attached, updated template, dated September 15, 2016, replaces the previous License Attachment 6, Closure and Post Closure Care Plans Salzburg Landfill. Also attached are the updated signature page and list of Amendments page for Salzburg Landfill, an updated Condition VIII.F.5 relating to the post closure care period, and an updated Part XII, reflecting the current status of the Compliance Schedules.

Required Follow Up

In accordance with R 299.9519(6)(b) of the administrative rules promulgated pursuant to Part 111, Hazardous Waste Management, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, Dow is required to send notice of minor modifications to all persons on the facility mailing list and to the appropriate units of state and local government. Such notice must be provided within 90 calendar days of this approval. The updated facility mailing list is enclosed. Please notify the OWMRP of any addresses on the facility mailing list that are returned to sender and provide a scan of the returns or the original envelope for our records.

Should you have any questions regarding this License amendment, please contact Mr. Daniel Dailey of my staff at 517-242-7261; daileyd@michigan.gov; or DEQ, OWMRP, P.O. Box 30241, Lansing, Michigan 48909-7741; or you may contact me.

Sincerely,

Allan B. Taylor, Chief
Hazardous Waste Section
Office of Waste Management and
Radiological Protection
517-614-7335
